INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/IL04/00497**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement

Novelty (N)	Claims <u>1-11</u>	YES
	Claims <u>none</u>	NO
Inventive Step (IS)	Claims <u>1-9</u>	YES
	Claims <u>10,11</u>	NO
Industrial Applicability (IA)	Claims <u>1-11</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and Explanations (Rule 70.7)

Claims 10 and 11 lack an inventive step under PCT Article 33(3) as being obvious over US Patent No. 4,588,400 to Ring et al. Ring discloses an absorbent pad containing saline (column 7, line 13) and antibiotic agents (column 8, lines 40-50). The pad is capable of absorbing tattoo ink. Though Ring does not explicitly state that the pad absorbs 5 grams of moisture per 10 cm² in 20 minutes, Ring teaches that the absorbency of the pad can be altered in many different ways in order to provide various absorbing capabilities (see entire document).

Claims 1-9 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a method of removing tattoo ink from skin by puncturing the pigmented skin with a needle and absorbing the ink with a pad containing saline.

Claims 1-11 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry for the purpose of removing tattoo ink from the skin of a person.

PCT/IL04/00497

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claim 1 is objected to under PCT Rule 66.2(a)(v) as lacking clarity under PCT Article 6 because claim 1 is indefinite for the following reason(s): Claim 1 states that the step of injecting a solution is optional in line 7. It is unclear where this step should be included or excluded from the claimed method.

Claims 2 and 11 are objected to under PCT Rule 66.2(a)(v) as lacking clarity under PCT Article 6 because claims 2 and 11 are indefinite for the following reason(s): the term "and/or" renders the claim indefinite because it is unclear which substances should be included in the claimed invention.
